

## 'Gift of Time'

The Bermuda National Trust is excited about the success of our 'Gift of Time' environment enhancement programme. The programme aims to protect and preserve the Nature Reserves with the assistance of volunteer groups of school children, the corporate population and members of the community, by removing invasive species and planting native flora in their place.

The Trust is presently working to enhance the Gladys Morell Nature Reserve in Somerset, the Vesey Nature Reserve in Southampton and Tivoli Nature Reserve in Warwick. With more than 250 acres of open space to manage our challenges are great and every gift is fundamental to our success.

Our nature reserves and open spaces are for the enjoyment of all of Bermuda and her people and support the many plants and animals which keep our ecosystem in balance providing untold benefit and enjoyment. It is time for each of us to make responsible lifestyle choices to ensure the welfare of our islands and the generations still to come.

For more information on the Bermuda National Trust's "Gift of Time" programme in the Nature Reserves, please email your enquiries to [palmetto@bnt.bm](mailto:palmetto@bnt.bm) or call 236-6483 or visit the website at [www.bnt.bm](http://www.bnt.bm)
